TIGER PLUS

All Tiger models are manufactured by an International Standards Organisation quality certified company, conform to EN13240 and have been independently tested by the government-certified SGS Laboratory and carry the European CE safety mark.

All Tiger models far exceed European requirements for efficiency and CO emissions and can be installed in smoke control areas of the UK when burning smokeless fuels. AND...

Tiger SuperClean Stoves may be used in smoke control areas strictly in accordance with the instructions, when burning:

tiger SuperClean

UK: Untreated wood logs or smokeless fuels (*s21 of the Clean Air Act 1993*)

RoI: Wood logs, smokeless fuels or peat briquettes, but not petroleum coke (*Control of Atmospheric Pollution Regulations, 1970*)
